Management Discussion and Analysis of Financial Condition and Result of Operations

I. Industry Structure and Developments:

a. **Where we are**

The pharmaceutical sector is one of the key 25 sectors identified by the Government of India under the ambitious 'Make in India' initiative, which is likely to provide the necessary impetus to the sector in order to achieve its true potential. At present, the Indian pharmaceuticals industry is third largest in volume and the tenth largest in value, globally. The country's domestic pharmaceutical market is estimated at INR 2,400 billion and is expected to grow at approximately 12 per cent Compound Annual Growth Rate (CAGR) over the next three years. A significant increase in domestic consumption due to the higher incidence of lifestyle diseases, increasing health awareness, growing population, greater penetration in rural markets, and a nascent, yet fast growing health insurance industry, are some factors impacting the growth of the pharmaceutical market. Moreover, the country's low-cost production base and the patent cliff in the global arena significantly affect the export market; play an important role in the growth of the industry.

However, despite an attractive value proposition, the Indian pharmaceuticals industry is facing multiple challenges in terms of growing concerns over the quality of drugs, price control measures, over dependence on China for bulk drugs and lack of clarity and predictability in regulations and the Intellectual Property Rights (IPR) regime. Complex approval procedures and stringent regulations too have led to a considerable slowdown in the clinical trials industry, impacting the innovation and drug discovery environment in the country.

Key issues/challenges

- A unified ministry with policymaking and implementation powers that can reduce multiplicity in drafting regulations in the sector has long been overdue

- Lack of transparency in the regulatory system has hampered the drug approval process, and the lack of a single-window clearance system for setting up manufacturing units has made the process tedious and time-consuming
- An unpredictable price control mechanism has brought in uncertainty and a trust deficit into the system
- In recent times, certain data integrity issues reported in the country by the United States Food and Drug
- Association (USFDA) has led to an import ban on products made by Indian companies and have marred the image of the Indian pharmaceutical industry
- Heavy dependency on China for sourcing many critical intermediaries and Active Pharmaceutical Ingredients (APIs) could potentially create vulnerabilities for the health security of the population
- Complex procedures to conduct clinical trials, low investment in Research and Development (R&D), a lack of focus on cluster development, and ambiguity around the enforcement of IPR laws need to be tackled as well.

b. **Government's stance**

- A task force was constituted by the government to address issues relating to the promotion of domestic pharmaceutical manufacturing. It is, at present, working on various proposals and recommendations suggested by the same.
- The government had declared '2015 as the Year of Active Pharmaceutical Ingredients' and is now planning to announce the new bulk drug policy soon, which aims to bring down imports of bulk drugs and increase the domestic output. It also aims to make India self-reliant on bulk drugs by 2020

- A high-level committee would be set up to enable a single-window clearance system for the industry.
 - The government is also working on a proposal for setting up of a venture capital fund with corpus of about INR 500 crore.
 - A move to establish a separate pharma ministry in the next one year is expected to bring the Central Drugs Standard Control Organisation (CDSCO), Drug Controller General of India (DGCI) and National Pharma Pricing Authority (NPPA) under one ministry to streamline rules and regulations.
 - The government is expected to release a new IPR policy that is likely to increase predictability, clarity and transparency in the IP regime.
 - In the last 20 months, another 450 drugs have been added under the pricing control to the earlier list of 400 drugs, making a total of 850 drugs under price control, in an effort to improve accessibility to affordable medicines.
 - The government intends to expand 'Jan Aushadhi' scheme to offer more medicines and medical devices at affordable prices, by opening 3,000 'Jan Aushadhi' stores by 2017, from the current number of 121.
 - It also plans to strengthen the drug regulatory system in the country with an investment of INR 1,750 crore during 2015-16 to 2017-18
- c. Key announcements in the Union Budget 2016**
- The government announced to reinvigorate the supply of generic drugs and announced its plan to open 3,000 stores under the Prime Minister's Jan Aushadhi Yojana, during 2016-17
 - A new health protection scheme was introduced to cover poor and economically weaker sections of the society, under which health coverage of INR 1 lakh for a family is expected to be provided. Further, to safeguard senior citizens of age group 60 years and above, within the same section of the population, an additional benefit of INR 30,000 has been announced
- A National Dialysis Services Programme has been launched under the National Health Mission (NHM). The programme aims to provide dialysis services in district hospitals via a PPP model. Additionally, to reduce the cost of dialysis, certain parts of the dialysis equipment have been exempted from custom duty, excise, Countervailing Duty (CVD) and special additional duty (SAD)
 - A special patent regime has been proposed with 10 per cent rate of tax on income from worldwide exploitation of patents developed and registered in India by a resident
 - About 1,500 multi-skill training institutes are expected to be set up in the country with an allocation of INR 1,700 crore
 - For start-ups set up between April 2016 and March 2019, a 100 per cent deduction of profits for three out of five years has been introduced.
- d. Upcoming bulk drug policy**
- With the bulk drug manufacturing policy expected to come in soon, the sector is upbeat. Bulk drug manufacturers expect the policy to revive India's active pharmaceutical ingredients (API) market and trigger fresh investments worth ₹ 30,000-40,000 crore in setting up new manufacturing facilities and augmenting existing ones.
- Bulk drugs or APIs are basically the active raw materials used in a drug that gives it the therapeutic effect. Bulk drugs currently constitute only 10-12 per cent share in the country's ₹ 80,000 crore-domestic pharmaceutical sector. India is primarily dependent on China for its imports of bulk drugs. According to industry estimates, 70-80 per cent of the requirement of the industry is met by imports from China, varying across categories.
- Government officials declined to share the salient features of the upcoming policy.

However, they said many of the Katoch Committee recommendations would be implemented. The committee under former secretary (health research) V M Katoch was formed to suggest how India could reduce its dependence on China for bulk drugs.

The government has decided to relax a number of norms on environment clearances related to bulk drug manufacturing to encourage Indian drug makers and reduce the country's dependence on Chinese imports.

The decision, which was taken in a meeting between the commerce, environment and chemical and fertilizers ministries, comes at a time when the government is working on a bulk drug manufacturing policy.

"I had a meeting with chemical and fertilizers minister Ananth Kumar and environment minister PrakashJavadekar on Tuesday where most of the problems that the bulk drugs manufacturers had raised have been sorted out," commerce and industry minister Ms. NirmalaSitharaman said on the sidelines of the board of trade meeting on Wednesday 6th April, 2016.

Ms. NirmalaSitharaman said this week, "In India, the bulk drugs industry depends on China largely for most of its APIs. So we have been working on it. Now there is an interest for us to set up specified pharmaceutical zones where API manufacturers will be invited to set up units."

The government has also decided to set up three dedicated parks in the country where special priority will be given to bulk drugs manufacturing, Sitharaman added.

“Annexure B” to the Independent Auditors’ Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of SMS PHARMACEUTICALS LIMITED (“the Company”) as of March 31, 2016 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management responsible for establishing and maintaining internal financial controls base on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the Auditors’ judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A Company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company’s internal financial control over financial reporting includes those policies and procedures that

- (1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
